

Live Translation on Your Phone

Follow either of the two options below to access live subtitles and translated audio in your preferred language. No Wordly account is required.

Before You Start

Please check the following before joining:

1. **Turn off Silent Mode on your phone.** This is the most important step if you plan to listen to the translated audio. Silent Mode may prevent Wordly audio from playing, even when headphones are connected and the volume is turned up.
2. **Have your headphones or earphones ready.**
3. Connect to the event Wi-Fi (name: ARISRoadshow, password: ARIS2026) or ensure you have mobile data available.

Option 1 — Browser (Fastest, No Installation Required)

1. **Scan the QR code** with your phone camera:

2. Or open the **link**: <https://attend.wordly.ai/join/QWTB-6376>
Wordly opens automatically in your browser.
3. Choose the language you want to read or hear from the dropdown list.
4. If a Session ID is requested, enter this code: **QWTB-6376**.
5. Tap Attend.
6. Read the live subtitles on your screen. To hear the translated voice, tap the speaker icon and use your headphones. If you hear nothing, check first that silent mode is switched off.
7. To leave, tap the exit button or simply close the browser tab.

Option 2 — Wordly App (Recommended for Audio)

1. Before the event, download the free **Wordly Translation app** from the App Store (iPhone) or Google Play (Android) and accept the terms of service on first launch.
2. Open the app and tap “**I’ll listen or read**”.
3. Enter the Session ID.
4. Tap Join.
5. Choose your language from the dropdown at the top of the screen. By default the app uses the language already set on your phone.
6. Tap the speaker icon to hear the translated audio, and use your headphones. Silent mode must be switched off here too.

Why Use the App?

The app continues to play audio even when your phone is locked or asleep, allowing you to keep listening throughout the session. It also remembers your most recent session, making it easier to reconnect later. If the app is already installed, scanning the QR code or opening the session link will launch the session directly in the app.

During the Session

- You can change language at any time, in either the browser or the app, without leaving the session.
- Subtitles appear continuously as the speaker talks. The translated voice plays once a full sentence is complete, so there is a natural short delay between the speaker and the audio.
- When the speaker changes on the same microphone, the change is marked in the text.

Tips for the Best Experience

- Silent Mode off.
- Media volume up.
- Headphones connected.
- Test your audio before the session begins.
- Please use headphones or earphones to avoid disturbing other attendees and to prevent audio feedback in the room.
- Wired headphones provide the most reliable experience.
- If using Bluetooth headphones, pair them before entering the room and ensure your phone is connected to the correct device. Be aware that Bluetooth adds a slight extra delay.
- Arrive with a fully charged phone and consider bringing a power bank for all-day sessions.
- If using Google Chrome, disable Chrome's built-in Google Translate feature, as it may override your selected Wordly language.

The ARIS Suite gives organizations the intelligence needed for a detailed understanding of their processes, a clear path for improvement and the assurance that they are in control of their operations.
